

Ductile Iron Valves & Fittings

**Innovative
water solutions**

What we do

We design and manufacture reliable, long-lasting ductile iron valves and fittings.

But there's more:
we're a **cut above**.
Why?

- We stand by our customers in every step, before purchase, during, and after. Our hallmark is committed, efficient customer service.
- When needed, we design and build custom parts outside the standard product line.
- Committed to innovation, sustainability, and quality, we strive to give our best at all times.

Side by side with our customers

We solve water challenges

Your project needs focus. That's why we keep the customer at the centre throughout the entire project lifecycle, from concept onward.

Where our story begins

It started in 2011, in Sangonera la Seca, a small town in Murcia. We built a **multi-generational, cross-functional team**, blending **decades of industry know-how** with the drive and **fresh thinking** of the next generation. That mix lets us tackle every challenge with energy and a 360° view.

Our purpose

Innovation for water **supply, sanitation, and irrigation.**

OUR MISSION

Deliver a **trusted, end-to-end partnership**. We stay with you through the whole project, providing tailored, feasible, innovative, high-quality solutions to improve efficiency across water sectors.

OUR VISION

Be a **benchmark** for long-term, **trust-based** relationships—foreseeing real needs, for our customers and for nature.

OUR VALUES

- **100% customer commitment:** proactive, personalized service.
- **Teamwork that compounds:** seasoned expertise meets young energy to create positive impact.
- **Continuous innovation:** always finding smarter ways to optimize resources and processes.
- **Sustainability first:** solutions designed to respect the environment.

Responsibility and Sustainability: our main currents

Water is essential and increasingly scarce, and we act accordingly. We are committed to manufacturing products that improve water efficiency and support sustainable development. From supply systems to irrigation, our innovations are designed to optimize resources and protect the environment.

These are the values we'll hold to as we grow. We are expanding into new international markets, yet our course remains clear: **develop products that make better use of water** and enhance community well-being.

Certified Quality: we keep it flowing

We guarantee reliability and durability in every part—backed by leading **international standards**:

QUALITY MANAGEMENT

- **ISO 9001:** Quality management system.
- **ISO 14001:** Environmental management system.
- **ISO 45001:** Occupational health & safety management system.

PRODUCT COMPLIANCE

- **UNE-EN 545:** Ductile iron fittings (mechanical joint / swivel-flange fittings).
- **UNE-EN 1074-2:** Gate valves (water supply—fitness for purpose).
- **UNE-EN 12842:** Ductile iron fittings for PVC pipelines.
- **CE MARKING:** Gate valves.

COATING APPROVALS

- **WRAS APPROVAL:** Coating for contact with potable water.
- **ACS CERTIFICATION:** Sanitary compliance (France).

GASKET / SEALING

- **UNE-EN 681:** Elastomeric seals for water and drainage.

“Beyond standard solutions”
isn't a tagline,
it's how we work.

CONDOR WATER SUPPLY, S.L.

Innovative water solutions

Our approach: confluence

**“With you on the team, we solve,
create and innovate”**

This line captures who we are and our promise to tackle the toughest challenges alongside the client. We become an active member of the project team. We lean into customer service and clear communication because combining perspectives and expertise is what makes an integrated, effective project.

Innovation starts with a challenge.

Sectors we serve

Water supply

Our valves ensure a steady, safe and clean flow.

Agricultural irrigation

We protect water use by optimizing flow with durable, long-life ductile iron fittings.

Sanitation

Fittings engineered to withstand the demanding conditions of wastewater networks.

Driven by innovation, we operate across the following applications:

Over a decade of experience with first-day drive

Our team is built on passion and expertise. The result is reliable parts and standout customer service.

Our products

In our technical catalogue you'll find a full range of valves and fittings engineered to meet (and exceed) the needs of water supply, irrigation and sanitation projects.

We also understand that standard solutions don't always fit unique site conditions. When needed, we develop custom products to match real-world requirements. We believe in direct, trusted communication so we can deliver a truly rock-solid product and service.

How we organise our portfolio:

Ductile iron fittings

- Mechanical joint fittings
- Loose flanged fittings
- PVC fittings

Ductile iron valves

Pipe joining and repair fittings

Tapping saddles

Steel flanges

Dismantling joints

Designed for performance and endurance

Each product line is built to the highest quality standards to ensure efficient, long-lasting solutions for your water projects.

Breaking new ground

We're growing every year, professionally and geographically. Today we supply and participate in projects in **Mexico, Italy, France and Portugal.**

New projects currently in development will further extend our reach.

Why Condor?

Focused on project needs

We keep our attention where it matters: on your project and your timelines. We know our customers and their sites, and we give each one the dedication it deserves.

Global presence

Clients in more than ten countries trust our solutions, including France, Italy, Portugal and Mexico. Driven by innovation, guided by water.

Young energy, seasoned experience

A consolidated company in the sector with the curiosity to keep learning and the ambition to keep improving.

Pioneers in the field

We continually pursue innovative, sustainable answers for water supply, sanitation and irrigation, all with the goal of improving operational efficiency.

Sustainability

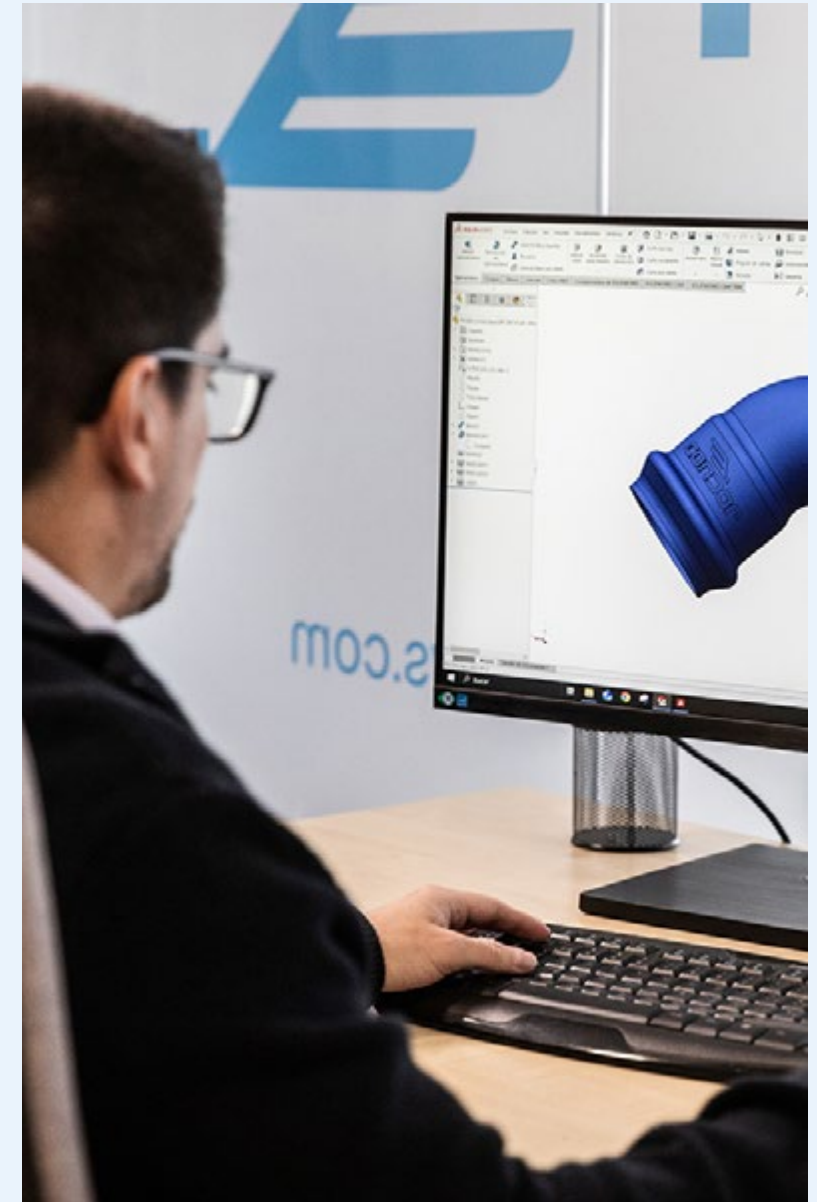

Aligned with the 2030 Agenda, we design to reduce environmental impact. We cut energy use, manage resources responsibly and engineer products that make water conveyance more efficient.

Beyond the catalogue

It's frustrating not to find what you need, especially mid-project or during a repair. At Condor, we go further than standard ranges.

We like to innovate, take on challenges and deliver. That's why we offer made-to-measure designs to address the specifics of each case and each client, providing unique solutions for any environment.

We adapt to your needs, so constraints don't stop your project.

Trusted by

Our customers are everything to us. We're grateful for new partnerships and for those who have been with us from the beginning.

We support projects of all sizes and all types of operators.

Clients such as **Canal de Isabel II, Aguas del Huesna, Aljarafesa, Emproacsa, Veolia and Aqualia** place their confidence in our work.

Technical service

We can start with a
no-obligation conversation.

And our job doesn't end with delivery. We provide full follow-up, from manufacturing through technical support.

Our team is available at every stage of the project to advise you and give you clear answers—no generic responses and no copy-paste solutions.

Want to know more?
Or ready to set us a new challenge?
**Get in touch and our team will get
you the answers you need.**
